FARM WAR NEWS

DEPT. OF AGRICULTURE

AAA ELECTIONS SCHEDULED FOR NOVEMBER AND DECEMBER

The election spotlight will soon turn on New Mexico's 31 counties, where farmers will choose community and county AAA committeemen in elections scheduled between November 14 and December 15.

"AAA committeemen represent both their neighbors and the nation in the work and responsibilities of the Agricultural Adjustment Agency," C. V. Hemphill, chairman of the State AAA Committee, said today. "Their recommendations, based on experience and discussions, help shape agricultural programs to fit the needs of their own counties and to meet the problems of farmers and consumers throughout the nation."

GRAIN SORGHUMS ARE THE ANSWER

John Carter's discussion of grain sorghums and their importance in post-war agricultural planning featured the annual meeting of the New Mexico Crop Improvement Association at State College this week. Mr. Carter, who is in charge of the agricultural experiment station at Clayton, expects more and more farmers to turn to grain sorghums as a money crop and as one of the crops in a planned program of crop rotation.

Other speakers on the two-day program were Glen Staten, associate professor of agronomy and Dean J. W. Branson, acting president of New Mexico A&M; William Johnson, Gero County Extension agent; J. M. Augustine, Jr., Dona Ana County Extension agent; and John T. Stovall, Extension agronomist and secretary of the Crop Improvement Association.

V-GARDENS STILL IMPORTANT

Although the War Food Administration has announced that there will be no victory garden goal for 1945, officials believe that every farm should have a garden large enough to meet the family's needs. City gardens are also encouraged.

the WPA says.

CATRON PLANS FOR THE FUTURE

Supervisors of the San Francisco Soil Conservation District in Catron County have adopted a detailed five-year plan for post-war conservation work.

The post-war program includes irrigation development and improvement, land leveling, terracing, stream-bank protection, building diversion dams, stock-water development, construction of water spreaders, and re-seeding range lands as well as the promotion of crop rotation, crop residue management, contour planting, and other methods of conservation farming.

BUT THE QUESTIONS LINGER ON

Farm machinery is no longer rationed, but county A.M. committeemen can't be blamed if they find it hard to believe.

During October, New Mexico's 31 county committees did a land-office business answering questions. Twenty-two counties report that 20 letters, 26 phone calls, and 55 office calls concerned--of all things--the rationing of farm machinery.

CHECK YOUR GAS COUPONS

Farmers and other-non-highway gasoline users who have "E" and "R" coupons not serially numbered must exchange them for new ration currency at their local war price and rationing boards. Farmers need not turn in coupons bearing serial numbers and lettered E-1, E-2, R-1, and R-2.

MISS GILBERT TO ADDRESS 4-H KIDS

Miss Rosemary Gilbert, acting club specialist of the Extension Service, will speak to the 4-H boys and girls of New Mexico over Station KOB Saturday morning, November 4, at 6:45.

Her subject is national 4-H club achievement week, which will be observed from November 4 to 11.

THE WISCONSIN LEGISLATURE

OF THE YEAR 1890

ASSEMBLED IN REGULAR SESSION

AT THE STATE HOUSE, MADISON, WISCONSIN

ON JANUARY 14, 1890

AND CONTINUED TO THE 15TH DAY OF FEBRUARY

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 16TH DAY OF MARCH

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 17TH DAY OF APRIL

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 18TH DAY OF MAY

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 19TH DAY OF JUNE

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 20TH DAY OF JULY

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 21ST DAY OF AUGUST

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 22ND DAY OF SEPTEMBER

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 23RD DAY OF OCTOBER

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 24TH DAY OF NOVEMBER

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

AND TO THE 25TH DAY OF DECEMBER

1890, AT THE STATE HOUSE, MADISON, WISCONSIN

FLOCK MIGRATES SOUTH

Kester D. Flock has transferred from the northern region of the Forest Service to the southwestern region, with headquarters at Albuquerque. He will serve in the division of range and wildlife management.

Mr. Flock has been with the Forest Service since he was graduated from the University of Montana in 1929 with a B.S. in forestry except for two leaves of absence. In 1941 he studied public administration in American University, taking his M. A. degree; and from 1942 until a few weeks ago he served as lieutenant in the Navy.

DAIRY TRANSPORTATION IS CONTINUING PROBLEM

With two wars yet to win, the director of the Office of Defense Transportation, Col. J. Monroe Johnson, says that dairy transportation conservation is still important. Director Johnson has high praise for the dairy industry's effective work. Close cooperation has saved almost 90,000,000 truck miles, 500,000,000 tire miles, 9,000,000 gallons of motor fuel, and 6,000,000 man-hours of labor.

HIGH FARM PRODUCTION STILL NECESSARY

Continued high farm production will be needed in 1945, J. B. Hutson, WFA's director of production, says, emphasizing that the many hazards connected with farming make it "unwise to permit the prospective post-war surpluses on some commodities to influence food production too greatly at this time."

Mr. Hutson admits that the end of the war in Europe will make a difference in the demand for U. S. food. "Yet if a choice must be made," he said, "it is far better to take a chance on having too much than it is to take a chance on not having enough."

ONE LUMP OR TWO?

Prospective supplies of sugar for 1945 indicate that all essential household and industrial requirements can be met and a limited amount provided for relief needs and the requirements of our allies, if consumers are careful.

FARM INCOME JUMPS

Cash marketing receipts from farm products during the first nine months of 1944 are now estimated at 13,800,000,000--six per cent above last year and double the 1938-42 average for these months.

FARM CENSUS WILL BEGIN SOON

An agricultural census, taken every five years, will begin soon in rural areas of the nation. The census of January 1, 1945, will list every farm and will cover basic information on acreage, land values, crops, and livestock.

The U. S. Department of Agriculture has assured all farm operators that the information they furnish will be treated confidentially.
